- TypeScript
- Fetch API
- HttpClient

Backend

- Express
- Node.js
- REST API
- Amazon API Gateway
- AWS Lambdas
- JWT
- Bcrypt

Database & Cloud

- Amazon Cognito
- Amazon DynamoDB
- MongoDB
- Prisma ORM
- Supabase
- PostgreSQL
- Render
- Netlify
- AWS Amplify
- Vercel

Industry Internships

WordPress Developer | Project Team Lead

Apr 2026 – Jun 2026

Utah Veteran Business Resource Center (VBRC) at Salt Lake City, UT

- Enhanced and maintained the WordPress website by implementing branded visual assets, improving UI consistency, and strengthening the organization's online presence
- Optimized site architecture through navigation restructuring, custom page organization, and integration of downloadable resources to improve user accessibility
- Configured and customized WordPress plugins to support promotional campaigns, event resources, and interactive website functionality
- Partnered with project managers to translate business requirements into responsive WordPress enhancements while maintaining usability, accessibility, and content quality

Mobile Developer | Project Team Lead

Jan 2026 – Mar 2026

SLC Weekly at Salt Lake City, UT

- Led end-to-end development of the Wallet module for the StellaMart mobile application, including project planning, technical design, and implementation
- Coordinated cross-functional collaboration for the Wallet feature set, aligning development tasks, timelines, and deliverables with project goals
- Designed and implemented a rewards dashboard UI to clearly present redeemable balances and detailed reward history within the app
- Developed responsive, mobile-optimized frontend components enabling users to redeem rewards and view dynamically updated point availability

Web Developer | Project Team Lead

Oct 2025 – Dec 2025

Firefly Events Inc. at Austin, TX

- Led frontend development and project planning for the Table Top Archive web application, coordinating tasks from initial requirements gathering through deployment
- Built responsive React and Bootstrap user interfaces that streamlined browsing, uploading, and managing board game listings across devices
- Developed reusable UI components and user flows to enhance usability and maintain consistent design on both desktop and mobile
- Collaborated on deployment activities and contributed to continuous improvements and feature updates during active development

Professional Experience / Contractor

Full Stack Developer | Product Owner

Jun 2026 – Sep 2026

Focus Flow at Salt Lake City, UT

- Led the product vision and roadmap as Product Owner, translating user needs and the Figma prototype into prioritized requirements, workflows, and development goals
- Built a responsive React application with reusable components and configurable focus sessions featuring task selection, objectives, timers, pause and resume controls, and completion tracking
- Developed audio and playlist functionality that allows users to upload, organize, save, and play background audio during focus sessions
- Integrated AWS authentication, APIs, database and file storage, profile management, and production deployment while coordinating testing and feature refinement

Full Stack Developer

Aug 2026

Bias Board at Salt Lake City, UT

- Built a responsive Next.js UI with public idol pages, auth screens, and dashboards improving user navigation and mobile access
- Developed an Express REST API for accounts, idol profiles, favorites, rankings, notes, and admin operations to centralize backend logic and permissions
- Designed a relational PostgreSQL schema for users, idols, and favorites with foreign keys to enforce data integrity and simplify queries
- Implemented JWT auth, bcrypt password hashing, protected endpoints, and role-based admin access to strengthen application security

Full Stack Developer

Aug 2026

Reel Reviews at Salt Lake City, UT

- Designed and developed a responsive movie-journal interface using Next.js and React
- Created reusable navigation, review-card, review-list, search, and form components
- Built Express REST endpoints for creating, retrieving, and searching movie reviews
- Connected the backend to Supabase and implemented validation, error handling, unique IDs, and timestamps

Full Stack Developer

Apr 2026 – Jun 2026

Review Everything at Salt Lake City, UT

- Translated the original Review Everything Figma wireframes into a responsive React and TypeScript application
- Integrated the TMDB API for trending movies, genre discovery, movie details, actor biographies, filmographies, and search
- Built Express REST endpoints and MongoDB models for creating, retrieving, editing, deleting, liking, and commenting on reviews
- Configured Docker services, database seeders, API tests, environment variables, and AWS Amplify frontend deployment

Full Stack Developer

Jan 2026 – Mar 2026

Task Flow Pro at Salt Lake City, UT

- Contributed to the initial planning and established the application's frontend foundation
- Created the core React Router structure and navigation between application pages
- Developed baseline responsive styling and reusable interface patterns with Tailwind CSS
- Implemented the task-attachment workflow, including file selection, uploading, and attachment display

Full Stack Engineer | Project Manager

Mar 2025 – Sep 2025

Celestial Charm at Salt Lake City, UT

- Led development of a responsive, mobile-first e-commerce application using React and Vite.
- Built reusable storefront and dashboard components with streamlined product discovery and shopping flows.
- Developed Express REST APIs and MongoDB models for users, products, quizzes, reviews, and store operations.
- Implemented secure authentication, checkout, wishlists, virtual currency, and production deployment.
